**Protect
your Back!**

KASPER
TECHNOLOGIE
Ltd.

Really successful are those things that make life easier and which protect and sustain your wellbeing.

Protect your arms and your back!

„Titan-Alu“:

Make your life easier. Have you heard of our Titan Alu? – it's the indispensable tool for everyone working with sewer manhole-covers and oil-separator, gas, water or cable pit covers.

For round and rectangular covers

Offers easy handling of stuck, silted up, rusted, stiff or iced up covers, simply by pressing, lifting, pushing and pulling !

- Leverage effect
- Lifting force up to 2000 kg
- Closes without risk of injury

„Titan-Alu“ is the perfect tool for you!

When conditions are tough, the right tool makes the job easier and quicker.

Thanks to the various ways it can be fitted, the “Titan-Alu” works with nearly every cover.

Can be used to raise water and gas shut-off valve covers.

Particularly useful where drains are being installed, on gravel or uneven surfaces, and especially with elevated manhole chambers or on embankments.

The ideal tool for:

- town councils
- building firms
- sewage plants
- waste water authorities
- highways agencies
- sewer cleaning & repair companies
- pipe inspection firms
- petrol stations
- fire brigades
- etc..
