

P-CABLE

Data sheet P-CABLE Basic SSG

Universal sealing for cables and pipes.
With super segment ring technology Ø 18 - 65 mm.

Seal tightness tested
by independent test
institute

The innovation among press seals

P-CABLE Basic SSG is the universal solution for sealing both newly installed and pre-laid cables and pipes in core drill holes and wall sleeves of diameter 100 mm, as they are supplied already in sections.

Labelled segments and the integrated torque control increase their reliability in use and significantly reduce the installation time required.

Cables or pipes of diameter 18 to 65 mm can be sealed with 12 segment rings. Thanks to the integrated blind plug, the P-CABLE Basic SSG is also suitable for closing reserve openings.

P-CABLE Basic SSG, article code: HSD 100-SSG 18-65

P-CABLE Basic – the advantages at a glance

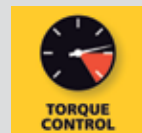

- super segment ring technology for cables and pipes diameter 18-65 mm
- split version, suitable for retrofitting
- segments with exact diameter labelling
- for core drill holes/wall sleeves diameter 100 mm
- seal width 40 mm, pressure-tight up to 1 bar
- integrated torque control
- U-profile: maximum stability for minimum material use
- stainless high-grade steel AISI 304L
- integrated blind plug

Hauff-Technik working principles – the intelligent difference.

Variable and completely leakproof.
Simply tear off segments until it fits.

Visible and tangible.
Torque indication.
