

Hybrid Network Termination Point with Keystone

GENERAL DATA

<p>Item</p> <p>Description</p>	<p>Wall outlet to terminate the SmartTube Indoor cable</p> <p>The outlet is designed to house up to 2 SC-type fibre connectors and one keystone. The sides (left or right) for the fibre connectors are interchangeable; to maintain a safe fibre environment only 2 connectors may be installed. The integrated splice holder makes it easy to store up to two splices, this makes it possible to splice a pigtail to the fibres of the SmartTube Indoor cable.</p> <p>The Hybrid Network Termination Point is standard equipped with a keystone, the SC adapters and pigtails can be ordered separately.</p>
