

CUBIC

CUFLEX - FLEXIBLE BUSBARS

Tested flexible busbars

Cu-flex is made of copper wires that are woven to a flexible busbar. By the use of a patented technique, the ends of the busbar is forged to a solid unit, thus obtaining a contact surface that makes it possible to make maintenance-free connections.

TESTED FLEXIBLE COPPER BUSBARS

Cu-flex busbars ensure a prompt and professional execution of electrical connections. The busbars are supplied ready for use! This means that you do not have to spend time on shortening, stripping the wires, making holes, or complicated bends.

Cu-flex has been tested and approved under various circumstances by i.a. DEKRA and DNV/GL.

In addition Cu-flex is UL recognized in category "Component - Panelboard and Switchboard Accessories".

ADVANTAGES WITH A CU-FLEX BUSBAR

- Delivered ready for use
- No shortening, stripping or making holes for fitting required
- Multi-flexible
- Rated current at 30°C = 1040A
- Lengths 160 - 1120 mm
- Time-saving installation
- Does not contain dioxins
- Up to 1000V

BUSBAR WITH A MINIMUM OF MAINTENANCE

A Cu-flex copper busbar is made of copper wires that are woven to a flexible busbar. CUBIC's patented technique forges the ends of the busbar to a solid unit. No tin or the like has been added.

Thus obtaining a contact surface that makes it possible to produce maintenance-free connections.

Connection:
Busbar to busbar

Connection:
Between electrical components.

Worldwide solutions

CUBIC is founded on a unique idea of a modular system for construction of electrical panels. This idea has developed CUBIC into a global and recognised partner with a product range that comprises any type of enclosure.
