

Wrapmaster®

**NEW
PRODUCT!**

98%
RECYCLED
ALUMINIUM FOIL.
Perfect for the demands of any
PROFESSIONAL
KITCHEN.

Wrapmaster®, the ultimate dispensing system
for film, foil and baking parchment

98% RECYCLED ALUMINIUM FOIL.

HIGH QUALITY

recycled industrial aluminium foil from Wrapmaster® has the same product properties as conventional foil with no loss of quality or performance.

LESS ENERGY

It is made from a less energy-intensive production process compared to conventional foil, only 5% of the energy is required.

STRONG, DURABLE AND 100% RECYCLABLE

Aluminium is endlessly recyclable, so carbon savings increase every time the metal passes through the recycling loop.

100% CIRCULAR

By 2025 our aim is for all Wrapmaster® products to be 100% circular. This means that we will only use recycled or renewable materials in the production process, and all of our products will be completely recyclable or biodegradable after use.

Wrapmaster® recycled industrial foil refills are available for use in the Wrapmaster® 4500 and Duo dispensers in a case size of 3 x 90m.
