Distributed by

Domus Auto

Alternating Pressure Redistribution System

- Suitable for patients with medium to high risk of pressure injury
- Automatic adjustment providing optimal pressure according to patient's weight
- CPR knob for quick deflation & maximum security
- Heel relief function for optimal heel protection

Care for a Healthy Life

APEX

Domus Auto

Alternating Pressure Redistribution System

Cell-on-Cell Design (8")
The bottom cells prevent the patient from bottoming out in case of power failure

Heel Relief Function
Individual detachable air cells prevent pressure injuries on the heels

CPR Knob
Designed for quick mattress deflation in case of emergency and prevents accidental triggering

4-Way Stretch Cover
Low friction and shear cover with high moisture-vapour transmission rate for better microclimate management

Biocompatibility

Vapour Permeable

Water Resistance

Flame Resistance

Enhanced Cross-Infection Control
Made with all-around-zipper and welded seams for easy removal and prevents fluid ingress

Quick Connector with Cap
Facilitates system installation and seals the mattress for patient transportation up to 8 hours

Automatic Adjustment
Automated calibration for constant pressure adjustment according to the patient's weight and position

Tuning
Pressure tuning option to meet patient's comfort preference

Visual and Audible Alarm

- Low Pressure
- Power Failure
- Tech Support

Pressure Relief During Alternating

The Domus Auto is an automatic pressure adjustment system, designed to maximize patient's safety and offers multiple therapy modes that are capable of fulfilling various clinical needs for better patient care.

5 Modes to Fulfill Individual Needs

- Max Firm
- Alternating
- Continuous Low Pressure (CLP)
- Seat Inflation w/ Alternating
- Seat Inflation w/ CLP

Alternating

- Alternately inflates and deflates air cells allowing pressure redistribution and encourage tissue reperfusion

Max Firm

- A static firm surface for nursing procedures. It will automatically return to alternating mode after 20 minutes

Constant Low Pressure (CLP)

- Provides a constant static surface in lower pressure with a greater contact area for patients to be immersed and enveloped better

Seat Inflation

- Adjust the pressure to suit the patient in a sitting position. It can be used with alternating or CLP mode

Specifications

Model		Domus Auto	
Pump	Dimension	29 x 18.5 x 12.6 cm	
	Weight	2.2 kg	
	Case Material	Flame Retardant ABS	
	Supply Voltage	AC 220 – 240, 50 Hz	
	Operating Cycle	10 mins	
Mattress		5" Overlay / 5"+3" Replacement	8" Replacement
	Dimension	200 x 80/85/90 x 12.7 cm	200 x 80/85/90/100 x 20.3 cm
	Cell Height	5" x 17 Cells	8" x 20 Cells
	Weight	5.6 kg	6.9 kg
	Cover Material	4-Way Stretch	4-Way Stretch
	Cell Material	Nylon TPU	Nylon TPU
	Maximum Patient Weight	200 kg	250 kg
Flame Retardant Standards	EN 591-1; EN 591-2	EN 591-1; EN 591-2	

**Domus Auto 5" Overlay should always be used on top of an existing surface or an additional foam
