-25°C <Ta < +40°C, 220V – 240V ~ 50/60Hz, Class I, IP65

### Installation

1. Ensure mains supply is switched off before commencing work.
2. Select suitable location for luminaire: Avoid area where a shadow may fall on the sensor. Ensure that the diffuser does not become dirty. Do not allow artificial light to activate the sensor. Artificial lighting may false trigger the sensor
3. Open the diffuser by removing screws, mark wall with appropriate fixing positions. Before drilling, ensure that the hole does not impinge on pipe work, cables or other building services.
4. Mount the base of luminaire on wall and attach diffuser.
5. The luminaire is supplied with 1.5m of rubber cable. Using suitable IP rated enclosure terminate Brown (Lin), Blue (Neutral), Green/ Yellow (Earth) and if required Black (Lout) to switched supply. If Black (Lout) is not used please terminate in an un-used terminal.

Note: It is not possible to control more than 250W of LED load or 4 additional fittings.

This product has no user serviceable parts. If any part is damaged, disconnect from mains and discontinue use.

**The Installation must be carried out by a qualified electrician**
